

Noise survey — Production area

Measured locations and estimated spatial variation

SURVEY

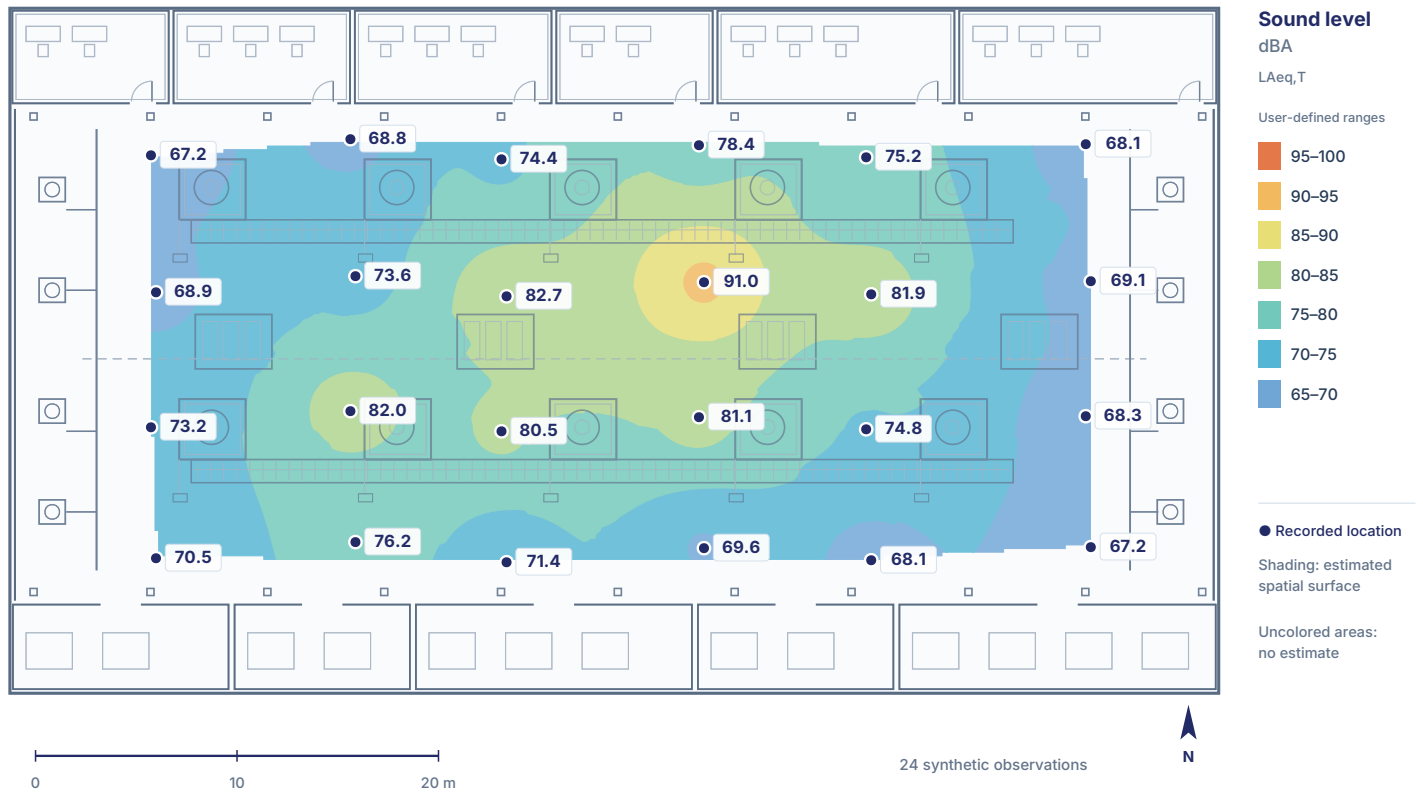

Production area

OBSERVATIONS

24 locations

QUANTITY

LAeq,T · dBA

Illustrative facility drawing · Demonstration data

MAPPING METHOD

Spatial IDW of measured dBA levels.
Distances are expressed in meters.
Color intervals are user-defined.

READING THE MAP

Point labels show the synthetic observations.
Shaded areas show the estimated surface.
Uncolored areas have no estimate.

DEMONSTRATION DATA

This illustrative facility and dataset are provided for design review.
